

Josyula Sai Krishna Priya

Data Analyst | Hyderabad, India

jskp2001@gmail.com | 9372683754 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of IT experience delivering end-to-end business intelligence solutions, backed by a strong foundation in 5G data quality and backend testing. Proficient in architecting data warehouses in Snowflake, designing star schema data models, and developing complex DAX measures in Power BI. Experienced in automating ETL/ELT pipelines and applying coursework training in foundational actuarial mathematics to support data integrity, statistical analysis, and executive reporting.

SKILLS

- **Data Analytics Tools:** Power BI, DAX, Power Query, Tableau, Excel
- **Programming & Databases:** SQL, Snowflake
- **Data Quality & ETL:** ETL/ELT Pipelines, Data Cleaning, Data Transformation, Data Validation, Data Modeling
- **Statistical & Analytical Skills:** Quantitative Analysis, Statistical Analysis, Root Cause Analysis
- **Reporting & Visualization:** KPI Dashboards, Visualizations, Business Storytelling, Agile
- **Other Tools & Technologies:** Jupyter Notebook, Git, Bitbucket

EXPERIENCE

Data Analyst, Capgemini, Hyderabad

Mar 2024 – Present

- Engineered and validated 5+ interactive Power BI dashboards integrated with SQL views, managing data modeling, DAX measures, and workspace publishing protocols that reduced manual reporting turnaround by 30%.
- Developed complex DAX measures, data models (star schema), and automated Power Query transformation logic to standardize disparate data sources for executive reporting.
- Facilitated cross-functional syncs across 4+ technical and business teams, translating complex data trends into executive summaries to support data-driven decision-making.
- Executed automated data validation and reconciliation protocols across reporting tables, ensuring high data integrity and consistency between source systems and final dashboards.
- Directed end-to-end project delivery by aligning technical data workflows with core business objectives to improve decision-making accuracy.

Testing Analyst – 5G TMA Application, Capgemini

Sep 2022 – Feb 2024

- Executed backend functional testing for the TMA application, validating 5G data-related features and ensuring high-performance integration within the Capgemini ecosystem.
- Performed comprehensive data validation and issue verification to identify backend discrepancies, collaborating directly with developers to resolve bugs.
- Ensured seamless module functionality by conducting rigorous end-to-end testing of newly introduced 5G features and backend workflows.
- Optimized application reliability through systematic backend validation, contributing to the successful deployment of data-intensive 5G solutions.

PROJECTS

Supply Chain Analytics & Business Intelligence, *Portfolio Project*

Tech Stack: Snowflake, SQL, Power BI, DAX, Data Modeling (Star Schema)

- Architected a multi-tier data warehouse in Snowflake across 3 schemas (Raw, Staging, Analytics), modelling 5-dimension tables and 1 centralized fact table.
- Automated SQL transformation and ETL pipelines across 50+ supply chain attributes, calculating shipping delay days, profit ratios, and a 50% late-delivery risk flag.
- Streamlined reporting by building an interactive Power BI dashboard to monitor order fulfillment, lead times, and regional inventory across 5 global markets and 23 order regions.

HR Analytics Dashboard, *Portfolio Project*

Tech Stack: Power BI, Power Query, DAX, Excel

- Designed interactive Power BI dashboards tracking 2,800+ employees across 10 business units, 6 departments, and 3 pay zones.
- Built DAX measures to evaluate talent health, analyzing an 86% retention rate, work-life balance scores, and performance across 25 divisions.
- Translated complex organizational data into clear visual storytelling reports to support strategic retention planning and proactive talent management.

Workplace Productivity Tracker, *Portfolio Project*

Tech Stack: SQL, Power BI, DAX, Excel

- Developed an operational productivity tracker modeled after Sapience tools, analyzing employee records across 195+ client projects.
- Engineered structured SQL queries to evaluate productive hours, delivery efficiency (44% completed ahead of schedule), bench duration, and appraisal eligibility (35+ employees with 10+ review cycles).
- Implemented an interactive Power BI dashboard featuring project-level utilization summaries and timeline comparisons to identify delivery risks and optimize resource allocation.

EDUCATION

Bachelor of Technology – Electronics & Communication Engineering

2018-2022

Nalla Narasimha Reddy Education Society's Group of Institutions

CERTIFICATIONS

Snowflake SnowPro Core Certification Preparation - COF- CO2

Data Analysis with Python and Pandas

SQL for Data Analysis
